Introduction

Another Resource to look at:

https://knowledgebase.omax.com/protomax/...

Step 1 — Moving the Nozzle

- Move the nozzle, so that there is nothing below it

- Ideally the nozzle should be between the metal slats, if installed

- If you need further information on the location. Please refer to the link in the description.
Step 2 — Preparing the Nozzle

- Make sure the splash guard is up.

Step 3 — Preparing the Nozzle (Part 2)

- Remove the garnet tube from the nozzle body.

Step 4 — Getting ready

- Close the Water jet cover

- proceed to the application on the laptop.

Step 5 — Navigating through the Protomax Software

- Click the test button on the console/home screen

Step 6 — Flush Plumbing

- Choose the "Flush Plumbing" option

- Continue to the next window

Step 7 — Flush Plumbing Part-2

- Start the process, by hitting the button shown.

- Wait for about 10 seconds, for it to flush any garnet left in the nozzle.

- After 10 seconds, go ahead and cancel the process.
