Step 1 — What is Autodesk Fusion 360?

- Autodesk Fusion 360 is a software primaily for computer assisted design (CAD). It provides tools to design 3D models for everything from medical devices to sculptures

- Fusion 360 also enables documentation and display of 3D models with rendering, animation, and technical drawing tools

- Fusion 360 also has a simulation platform used to predict the behavior of a 3D model under loads.
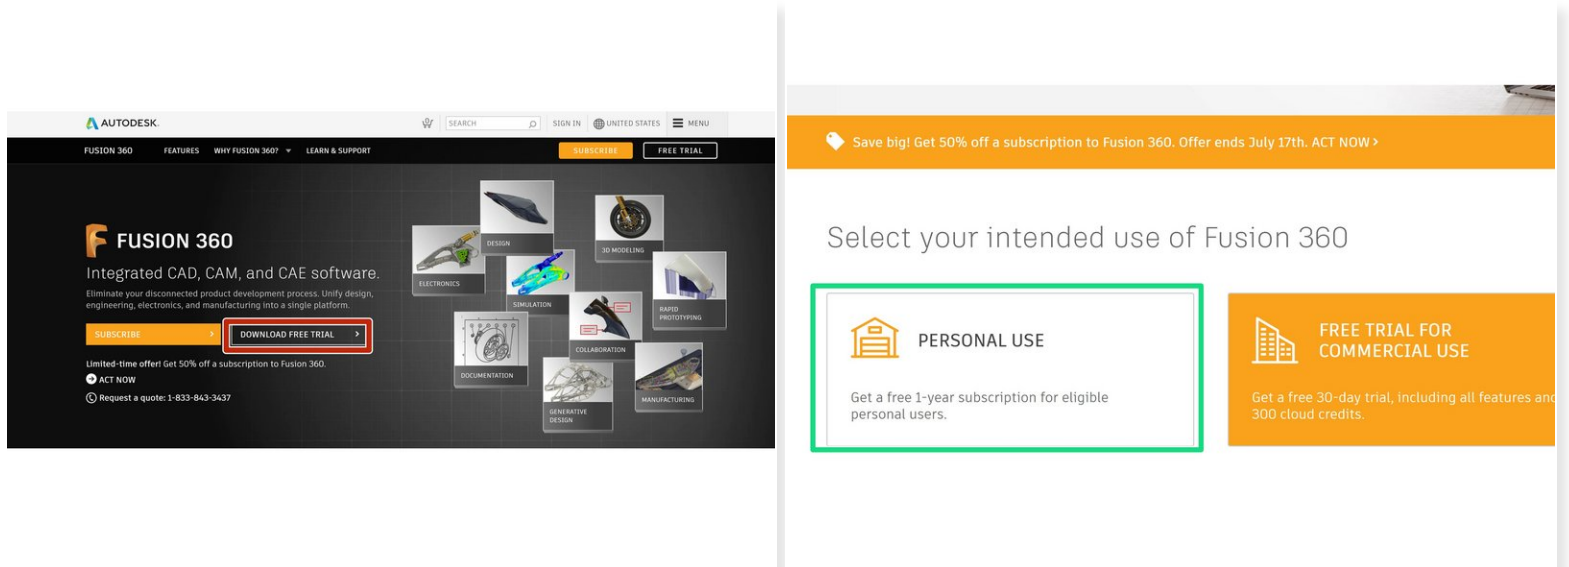

Step 2 — Installing Fusion 360 with a .edu Email

- Autodesk allows students and faculty with .edu email addresses access to free individual licenses

- From the Fusion 360 homepage (https://www.autodesk.com/products/fusion...), click the hamburger menu for the shortcut to the Students and Educators page

- Open the Students and Educators page and sign in or create an account

- Open the page to download free software

Step 3 — Installing Fusion 360 with a .edu Email

- In the Free Software page, Fusion 360 should open as a larger tile. If it does not, click "View All Products" and scroll to the Fusion 360 tile

- Click on the button to install an individual license of Fusion 360.

- Once Fusion 360 downloads and installs, log on with your .edu account.

Step 4 — Installing Fusion 360 without a .edu Email

- If you do not have a .edu email, Autodesk still gives free 1 year subscriptions to Fusion 360 for personal use

- On the Fusion 360 homepage, click the button to open the free trial page

- Click the tile to download a free trial for personal use

- Now that you successfully installed Fusion 360, check out [Tour of Autodesk Fusion](#)
