

# 00. Schedule a Timeslot

Written By: Quinn Colville

## Step 1 — Slack RPL LC

---

- Set up a time to come to the RPL
- Schedule a two hour shift using [this appointment calendar](#)
- 0126 EGR
- ① Not to be confused with the RPC in TAP

## Step 2 — Submit a Request for a Fuse Part

---

- At least a few days before training, request a Fuse Part on Papercut
- Go to [ter.ps/papercut](https://ter.ps/papercut) and submit a new request for the Formlabs Fuse 1
- Title the job "MIC Training - YOUR NAME"
- Print something that would normally need supports
  - Fuse prints are self-supporting, so parts which would need support material on other printers, have no need on the Fuse
